

Hazardous Pathway Repair.

# Project Proposal:

11th Street Community Garden  
New York, NY 10009

To Purpose: Concrete & red brick supply stack for next spring vertical planting pots.

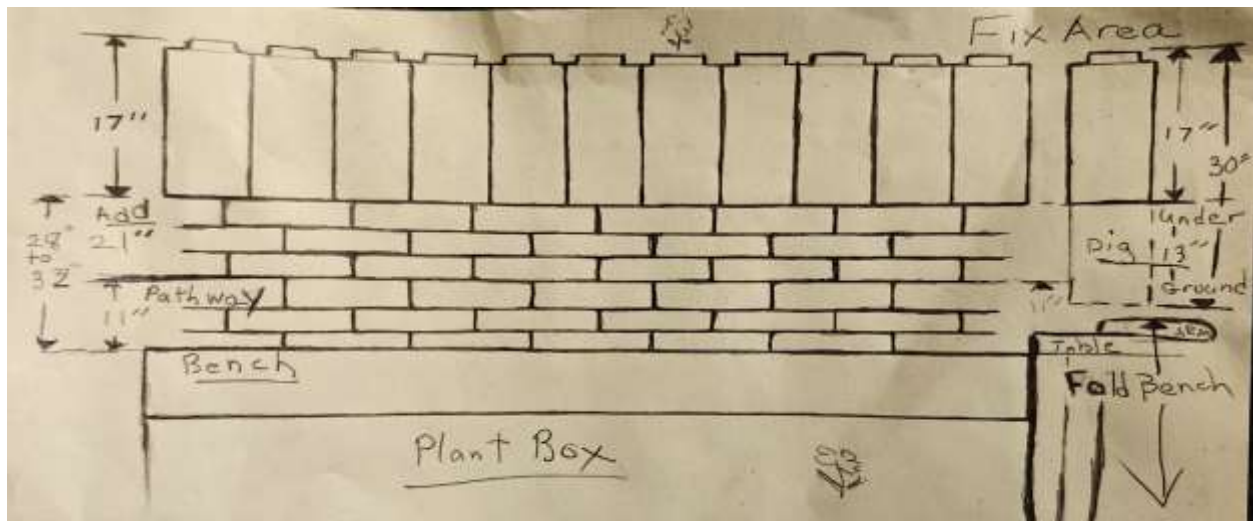

Photo touchup represents the desired result.

## Benefit:

- Put concrete stack into landscape, & pairs left side.
- Regain floor & table space blocked by concrete stack.
- Purpose concrete & brick stacks into blooming flowering planters.
- Reduce hazardous pathway.

## Hazardous Pathway Repair.

Currently a hazardous risk is present due to bench extensions into pathways

### Project Needs:

- Supplies: Use red brick and Concrete 30" depth stack ( some are shorter).
- before winter 12" to 14" dirt digs out into pots for spring reuse to achieve 17" exposed vertical planter row.
- Members project participation.
